

What to Expect: ReFocus Eye Surgery Center

The day before surgery

One of our nurses will call to review all instructions in detail. If you are unable to be reached by phone, please contact us so that you can be properly prepared for your procedure.

The day of surgery: Before

A nurse will prepare you for your procedure in our preoperative area. You will have the opportunity to ask any final questions of your ophthalmologist before surgery is performed.

The day of surgery: After

You will relax in a comfortable chair and be given a light snack and a beverage. All your postoperative instructions will be carefully reviewed with you. You will be given a satisfaction questionnaire, so that we can learn from your experience.

Once you're home

You will receive a call from our staff checking on your progress and asking if you have any questions.
